

EAST AURORA
SCHOOL DISTRICT 131

BUILDINGS & GROUNDS SERVICE CENTER

411 Hill Avenue • Aurora, IL 60505

d131.org • (630) 299-8340

November 15, 2019

Dear Parents, Students and Staff,

As required by the U.S. Environmental Protection Agency and Illinois Department of Public Health, East Aurora School District 131 inspected its schools for asbestos-containing building materials in 1988 and developed Asbestos Management Plans. Since then, the District has conducted re-inspections of the schools every three years. The last re-inspections were conducted in Spring of 2017 by Carnow, Conibear & Assoc. Ltd. The inspections indicate that none of our buildings pose a health risk to students, staff or the public with regard to asbestos.

As part of our annual update of the Asbestos Management Plans, we are providing this notice to you. The inspection reports and Asbestos Management Plans for each school are available for review at the District's Buildings & Grounds Service Center located at 411 Hill Avenue, Aurora, Illinois, or at the respective administrative office of each school.

For more information regarding the asbestos in our schools, please contact the Buildings & Grounds Service Center at (630) 299-8340.

Sincerely,

Steve Megazzini

Assistant Superintendent of Operations

East Aurora School District 131
