Interested in robotics, manufacturing, or skilled trades? Want to become an engineer, a machinist, a metalworker, or a programmer?

GCAMP (the Greater Chicago Advanced Manufacturing Partnership) is excited to host transformational summer tours for students (ages 12+) interested in STEM careers within manufacturing and industry.

- Explore the educational pathways that align with high wage industry careers.
- Go “behind the scenes” to see how some of the products we use every day are made.
- Interact directly with engineers, plant operators, and other industry professionals.

Register for one or more manufacturing tours using the site below. Limited spots are available. Parents, teachers, and counselors are also invited to attend, but each participant must register.

Don't miss out on this unique opportunity to explore your future career path!

Learn more at www.gcamp.org/tours

This activity is not sponsored by East Aurora School District 131, and any of its schools, or groups officially associated with the District.

Sodick

Friday, July 14 | 1:30am-3:30pm | Schaumburg

Sodick is the high precision machine tools company ranging from EDM (Electric Discharge Machines), High Speed Milling and 3D Additive Machine with Rigid Linear Motor technologies serving a wide variety of industries including Automobile, Aerospace, Medical and Semi Conductors.

Amsted Automotive

Tuesday, July 18 | 9:30am-11:30am | Geneva

Amsted Automotive works with top OEMs and hard-charging startups to reduce mass, extend range, improve safety, increase performance, and maximize drivetrain efficiencies, driving the future of propulsion. Amsted Automotive specializes in high efficiency mechatronic clutch designs, advanced metal-forming, powdered metallurgy, and engineering and manufacturing.

Custom Aluminum

Friday, July 21 | 9:00am-11:30am | Genoa

Custom Aluminum Products is recognized as a leader in the aluminum extrusion industry. Founded in 1960, Custom Aluminum Products is a technically advanced aluminum extruder specializing in custom extrusions, fabrication, welding, bending, painting, anodizing, assembly, and packing.

Wiegel

Thursday, July 27 | 9:00am-11:00am | Wood Dale

Wiegel provides leading OEM and tier manufacturers across the globe with progressive die heavy and high-speed metal stamping services. They support custom, high-volume production requests for precision, electrical connectors, contacts and various other electrical and non-electrical component parts. Wiegel also offers in-house support of rapid prototyping, tool design and tool production, waterjet and assembly services.
